

DIFFUSERS FOR ESSENTIAL OILS NEW GENERATION DIFFUSER

Enhance the Harmony and Well-Being of Body, Mind and Spirit with the Scents of True Aromatherapy

Our Essencia New Generation diffuser is quite an innovation in design. Contrary to other standard diffusers that disperse droplets of essential oils into the air, our New Generation diffuser disperses essential oils using ventilation, by means of a small fan located on the bottom of the diffuser. This method of diffusing the essential oils regenerates, purifies, disinfects, ionizes and scents the air.

Five reusable cotton Aroma Pad Refills: The New Generation diffuser is easier to operate than its predecessors. It is equipped with a drawer that holds a reusable cotton Aroma Pad that is designed to be saturated with 10 to 15 drops of an essential oil or oil blend. We have included 5 reusable cotton Aroma Pads with the diffuser for those of you who like to experiment with different scents.

Speed control: It is possible, with the New Generation diffuser to regulate the diffusion speed. This diffuser is also equipped with an LED light and a 12 volts AC/DC adapter.

How to use this diffuser: Simply place an Aroma Pad onto the oil drawer and saturate it with 10 to 15 drops of an essential oil or oil blend. Slide the drawer back into the diffuser and select the desired diffusion speed. After use, turn the button to Stop and unplug the unit. The cotton Aroma Pad can be used over and over again until it has lost all of its scent. We recommend you always use the same oil or oil blend on the same Aroma Pad to avoid disagreeable scents. Essencia Aroma Refill Pads can be purchased at pharmacies or health food stores. For the right choice of oils to use with the diffuser, ask us for the booklet: Discover Essential Oils, by Doctor. G.V. Bego.

NEW GENERATION AROMA PAD REFILLS

The Essencia Aroma Pad Refills are specially designed to be saturated with 10 to 15 drops of an essential oil or oil blend. These Refills fit the New Generation diffuser. Each box contains 10 Aroma Pad Refills.

DIFFUSERS FOR ESSENTIAL OILS 802 & OPTIMA DIFFUSEERS

Traditional Diffusers

These Essencia diffusers for oils are comprised of an air pump on which is mounted a Pyrex glassware, called a nebulizer, whose interior piping allows the essential oils to be dispersed into the atmosphere in a fine regenerating and purifying spray that disinfects, ionizes and scents the air. Essential oil diffusion does not damage the ozone layer because no propulsion gas is required.

802 MODEL:

Standard diffuser equipped with 2 pumps. Good choice for the home, the office, the hall entry, or a small store. Its 4 Watt motor guarantees an air output of 2 x 2.5 liters / minute. Pyrex glassware imported from France.

OPTIMA MODEL:

Very quiet "Pro" model. Excellent for big rooms, clinics and stores. Air output of 500 to 5 500 cc / minute. Pyrex glassware imported from France.

Recommended use:

Use Essencia essential oils with your diffuser (see E.O. combinations for diffusers, Synergies, and Pure E.O.). For a clean, scented environment, vaporize from 10 to 15 minutes, 1 to 2 times daily.
